

# Subject Index      Volume 279

- Accessory cells 561  
 Acne S104  
 Acquired epidermolysis bullosa 357  
 Acrotyringiura 421  
 Adenylate cyclase 530  
 Adnexal skin tumor 550  
 Aged S76  
 Aggregation 347  
 Aging S104  
 AIDS 204, 499  
 Allergy S108  
 All-trans retinoic acid 459  
 Amino acids 465  
 Anagen hair follicle 112  
 Anatomic site 351  
 Anthralin 59  
 Anti-DNA antibodies S92  
 Antiendomysial antibodies 454  
 Antigenic modulation S116  
 Anti-idiotypic monoclonal antibody 439  
 Arachidonic acid 347, 504  
 Aromatic retinoid 198  
 Arylhydrocarbon-hydroxylase (AHH) 521  
 ATP 59  
 Atopic dermatitis 215, S48, S55  
   — eczema 270, S59  
 Atopy 536  
 Autoantibody binding 206  
 Autologous T cells 89  
 Autophagocytic cells S38  
 Autoradiography 8  
 Autosomal dominant ichthyosis vulgaris 270  
  
 Basal cell carcinomas 37  
 Basal cells 68  
 Basophils 536  
 B cells S81, 374  
 Benign inflammatory dermatoses 83  
 Bentonite method 266  
 Beta-adrenergic receptor 439  
 Biosynthesis 251  
 Biotin-avidin immunofluorescence method 143  
 Blister fluid 558  
 Bone marrow transplantation 424  
 Bullous pemphigoid 558  
 Butchers' hand warts S66  
 BW 755C 44  
  
 cAMP S59  
 Calcitonin gene-related peptide 512  
 Calcium 184  
 Calmodulin 151  
*Candida albicans* phagocytosis 136  
 Capsaicin 44  
 Cell culture 20, 140, 257, 530  
 Cell-mediated immunity 366  
   — proliferation 521  
   — renewal time 281  
   — types 26  
 cGMP S59  
 Cheek 398  
 Chemokinetic activity 385  
 Chemotactic activity 418  
 Chemotaxis 449  
 Chemotherapy 219  
 Cholesterol sulfate 32  
 Chromosome aberrations 293  
 Cicatricial pemphigoid S30  
 Circadian plasma levels S59  
 Cohesion 184  
 Colchicine 392  
 Cold urticaria 512  
 Collagen 154, 299  
   — biosynthesis 303  
   — synthesis 308  
   — type IV 37  
   — types 303  
 Comedones 120  
 Concanavalin A 12  
   — receptors 392  
 Congenital cutis laxa 308  
 Contact dermatitis S108  
   — hypersensitivity reaction 491  
   — sensitivity 236, S111, S76  
   — sensitization 489  
   — urticaria 44  
 Corneocytes S97  
 Cryofibrinogen S24  
 Cryoproteins S24  
 Cultures 241  
 Cyclosporine S92  
 Cysteine proteinases 524  
 Cytochalasin B 392  
 Cytogenetics 366  
 Cytokines 470  
 Cytological atypia 167  
  
 DACM stain 406  
 Dansyl chloride 281  
 Delayed hypersensitivity 379  
 Delayed-type skin reaction 236, S111  
 Dendritic cells S88  
 Dermal connective tissue 406  
   — papilla cells 140  
 Dermatitis herpetiformis 232, 454  
 Dermatopathology S52  
 Dermatophytosis 498  
 Dermis 561  
 Dermoepidermal junction 357  
 Dermographism 512  
 Desquamation 184, 281  
 Dexamethasone 44  
 Differentiation 459  
 Diffuse dermal mast cell infiltration 130  
 R-3,4 Dimethoxydalbergione S108  
 2,4-Dinitrochlorobenzene S111  
 2,4-Dinitrophenylated epidermal cells S111  
 Diphenylhexatriene 278  
  
 Disaccharidase deficiency 315  
 Disseminated, bilateral, hyperkeratotic variant of PM S38  
 Disseminated cicatricial pemphigoid 357  
 DNA flow cytometry 20, 247  
   — hybridization, in situ 543  
 Doppler spectroscopy S97  
 DR + cells 495  
 Dyskeratotic cells S38  
  
 E5166 50  
 Effect of different pharmacological agents 247  
 Ehlers-Danlos syndromes 303  
 Ehrmann 415  
 Elastic fiber 406  
 Electron microscopy 167, 270, 308, S30  
   — spin resonance spectroscopy 59  
 Electrophoresis 251  
 Endothelial cells 26  
   — cytotoxic activity 415  
 Eosinophils 558  
 Epidermal cell 236, 321  
   — — kinetics 402  
   — — line 524  
   — cells, isolated and cultured 392  
   — — 241, 276, 278, 459, 470, 521  
 Epidermal cysts 449  
   — spinous cells 273  
 Epidermis 151, 251  
   — cells 89  
 Epidermodysplasia verruciformis 66, 366  
 Epidermoid carcinoma 470  
 Epithelial allografts 421  
   — tumor cells 161  
 Euchromatin 100  
 Extracellular matrices 241  
  
 Fast-mixing short-illumination technique 16  
 Fc-receptor 444  
 Fibroblast culture 299  
   — growth factor (FGF)-like substance 418  
 Fibroblastic DNA repair 125  
   — growth 26  
 Fibroblasts 154, 303  
 Filaggrin 465  
 Flow cytometric sorting 273  
 Fluorescence polarization 278  
 Forehead 398  
  
 Gamma interferon 161  
 Gliadin 232  
 Glucocorticosteroids 379  
 Glycoproteins 251  
 Glycosaminoglycans 251, 276  
 Graft-vs.-host disease 424  
 Granular cells 273  
 Granulocyte-activating mediators (GRAM) 470

S = Supplement

- Granulocytes 444  
Growth pattern 20  
Guinea pig 44
- Hair bulb papilla cells 20, 247  
— growth 140  
— melanosomes 54  
— root sheath fibroblasts 247  
HETE 504  
Herpes simplex 283  
— zoster 283, 374, S52  
Heterochromatin 100  
Heterogeneity 558  
Hexadecane 402  
HIV infection 499  
High-risk HPV type 16 543  
Histamine 536  
— receptor antagonists 44  
Histiocytosis X S88  
Histopathology 83  
HLA B8 444  
HLA-DR antigen 321  
— dependent function 321  
— expression 516  
— induction 161  
Hodgkin's disease 285  
HTLV-III antibodies 204  
Human epidermal cells 136  
— milk fat globule membrane 550  
— papillomavirus DNA 73  
— papillomaviruses 66, S66, S73  
— papillomavirus (HPV) 543  
— placenta 495  
Hybridization, in situ 73  
25-Hydroxycholesterol 32  
Hyperlinear palms 270
- Ia antigens 198  
Ia-reactive cloned T cells 198  
IgA immune complexes 315  
IgE 536  
Image analysis S104  
Immune complexes 435  
Immunocompetent cells 379  
Immunocytology S52  
Immunofluorescence 454  
Immunohistochemistry 550  
Immunopathology S30  
Inapparent infection S73  
Indomethacin 44  
Infection S48  
Infrared hyperthermia 209  
Initial blister formation 357  
— lesion 499  
Innermost cell layer 112  
Interferon S55  
Interferon-gamma S76, S92  
Interleukin 1 215  
Interleukin-2 S76, S92  
Intraepidermal sweat-duct unit 421  
Involucrin 335  
Isotretinoin 120, S97
- Kaposi's sarcoma 26, 499  
Keratinization 112, 120, 257
- Keratinocyte culture 32  
Keratinocytes 161, 241, 257, 335, 465, 516  
Keratinocytic DNA repair 125  
Keratins 37, 273  
Keratoacanthoma 73  
Ketanserin 3, 211  
Killing 136
- L3T4-positive cells 491  
Laminin 37  
Langerhans cells S88, 198, 236, 366, 424, 470, 489, 498, 516, S76  
Large cell lymphocytoma S81  
Laser S97  
Lectins 226, 232  
Leukocytes 449  
Leukotrienes 347, 504  
Lichen nitidus 77  
— planus 77  
Light and electron microscopes 112  
Lipid fluidity 278  
Lipids S97  
Lipopolysaccharide 470  
Lipoxygenase 427  
— products 504  
Livedo racemosa generalisata 415  
Location 487  
LTB4 427  
Lymphatics 327  
Lymph nodes 491  
Lymphocyte proliferation 215  
— subsets 215  
— UVC sensitivity 180  
— X-ray sensitivity 180  
Lymphoid cells 16  
Lymphoma 285  
Lymphomatoid papulosis 285  
Lymphoproliferative response S55  
Lysosomal hydrolases 299
- MAM antigen 550  
Malignant melanoma 226, 412  
Mastocytoma 130  
Melanogenesis 219  
Melanoma 219, S116  
— cells 167  
Melanosome isolation 54  
Membrane inhibition of oxidative phosphorylation 59  
Mice 130  
Mitochondria 59  
Monoclonal antibodies 68, 374, S116  
— antibody 550  
Monocytes 347, 374  
Morphology of warts versus papilloma-virus types S66  
Morphometry 167, 173, 308  
MRL/l mice 478  
Multiple epidermal cancer 180  
Mycosis fungoides 12, 83, 561  
Myeloperoxidase S63
- Nalidixic acid 147  
Natural killer cells 293  
Nevocellular nevus 226  
Nevocytic nevus 412  
Nevus cells 167
- Nitrogen laser 16  
Novobiocin 147  
Nuclear antigen expression 206  
— differentiation and fate 100  
— morphometry 412
- Oral carcinogenesis 543  
— mucosal lesions 543  
Organotypic cultures 335  
Outer root sheath 112
- Palmoplantar pustulosis 444  
Pam cells 276  
Pao ferro S108  
Patch test reactions 379  
Pemphigoid 241  
Pemphigus 241, 341, 516  
— foliaceus 143  
— vulgaris 143  
Percutaneous absorption 351  
Photosensitivity 125  
Pig epidermis 95  
Pilosebaceous follicles 190  
Plantar skin 489  
Plasmin 341  
Plasminogen 341  
— activator 341, S88  
Polymorphonuclear leukocyte locomotion 385  
— leukocytes 435, S63  
Porokeratosis Mibelli S38  
Porphyrins 190  
Prognosis 487  
Progressive systemic sclerosis 299  
Proliferation 89  
— in vitro 247  
*Propionibacterium acnes* 190  
Prostaglandin E2 536, S92  
Protease 184  
Proteinase inhibitors 524  
Protein kinase C 50, 95, 402  
— phosphorylation 95  
Pseudolymphoma S52  
Psoriasis 16, 68, 89, 147, 209, 347, 385, 435, 504, S48, S63  
Psoriatic epidermis 439  
— skin fibroblasts 206  
PUVA 206  
— treatment 16  
Puberty S104  
Purpura S24  
Pustulosis palmoplantaris 385
- Quantitative DNA cytophotometry 100
- Radioantibody binding assay S116  
Radioimmunoassay 151  
Radioimmunolectron microscopy S116  
Recombinant DNA 154  
Representative range 398  
Reticulin 232  
Retinoids 50, 257  
Retinoid treatment 366  
Root sheath fibroblasts 20
- Scanning electron microscope 327  
Scleroderma 8, 154

- Sebum S104  
— secretion 266  
Sequential studies 204  
Sera 415  
Serotonin 3, 211  
Serum chemotactic 385  
Sex 487  
Sézary syndrome 12, 293  
Sheep's wool follicles 140  
Sister chromatid exchange 180  
Skin 327, S81  
— artery 211  
— carcinoma 66  
— disease 151  
— lesions 478  
— organ culture 341  
— pH 398  
— sulfhydryl oxidase 194  
SLE S92  
Spindle cells 499  
Spitz nevus 226  
Spontaneous flare S111  
Stratification 459  
Stratum corneum 184, 281, 449  
Stroma reaction 418  
Subepithelial lymphocytes 315  
Substance P 512  
Suction blisters 512  
Systemic scleroderma 484  
T6+ cells 495  
Tar 130  
T cells S81, 293, 374  
Telangiectases 8  
Thin-layer chromatography 266  
Thin melanoma 487  
Tobacco 130  
Topical allergens 379  
TPA 50  
Transepidermal water loss 351  
Transplants 335  
Trichilemmoid carcinoma (TL-Ca) 418  
Trichilemmoma 530  
Trichophytin 498  
Tumor thickness 487  
Type III collagen aminopropeptide 484  
Tyrosinase 219  
Tzanck smears 283  
Ultrastructure 77, 173, 459  
UV 321  
UVA-pigmentation 173  
UVB 424  
— irradiation 478  
Vasoactive intestinal peptide 512  
Vasoconstriction 211  
Vegetating lesions S30  
Volume-weighted mean nuclear volume 412  
Whole blood cultures S55  
Xenografting 37  
X-Linked ichthyosis 32
